

Maximizing WIOA and non-WIOA Performance Data Cohort

What is a Cohort?

A cohort is an interactive technical assistance forum where cross-agency participants representing a combination of States and/or regions participate in the development of solutions to a specific challenge. Cohorts consist of teams of state participants who represent core WIOA programs and collaborate through an organized process to improve system integration. The cohort will work toward the following outcomes:

- The establishment of a strategy and/or plan to address the specified challenge within their own States/regions;
- The development of practical solutions to the challenge that can be disseminated to the field; and
- The creation of innovative ideas that have the potential to drive service integration and promote improved efficiencies.

Cohorts combine “team time” (within own State/region) with cross-state/regional collaboration using both virtual and in-person engagement.

Cohort activities include:

Kick-Off and Virtual Meetings: These meetings provide teams with an opportunity to network and discuss efforts underway in each state and collectively across the country. The virtual sessions will occur every 2 to 4 weeks for approximately 60-90 minutes. The meeting days and times will generally remain the same throughout the Cohort. *Between virtual sessions, cohort participants will also engage with other states through a web-based platform built to facilitate and encourage discussion and information sharing.*

Team Time: Individual team meetings allow participants time to share thoughts and discuss next steps towards team assignment completion and/or strategy implementation. This time also allows the individual state team to learn about cross-agency programs and explore integrated approaches to addressing the specified cohort challenge.

Wrap-Up Meeting: The Wrap-up meeting is a virtual session that will showcase the finalized product or innovation. Cohort participants will also use this time to gain consensus on the next steps concerning its dissemination.

Active Feedback: Cohorts are designed to be participant-led, requiring engagement, idea sharing, and feedback throughout its process. At the cohort’s end, participants will reflect upon the process and provide insights and recommendations aimed at improving the experience for future cohorts.

What is this Cohort All About?

The Goal: *In the Maximizing WIOA and non-WIOA Performance Data Cohort, State teams will explore different methods for using performance data to demonstrate programmatic achievements, challenges, and stakeholder return-on-investment (ROI). The discussion, developments, and promising practices shared throughout this effort will help to inform future federal technical assistance. States will also establish an action plan that will help enhance their vision and advance their efforts around measuring and assessing programmatic performance.*

What’s in it for my State? Together, State Teams in the Cohort will consider the challenges and opportunities around using performance data to demonstrate programmatic outcomes and improvements. They will have an opportunity to develop actionable solutions to issues affecting the alignment of program definitions, the development and utilization of state-specific performance indicators, state and local level understanding of the value of WIOA performance data, and system-wide efforts to measure state/local performance in real time. State Teams will have the opportunity to strengthen their interagency partnerships,

Maximizing WIOA and non-WIOA Performance Data Cohort

share different data demonstration strategies with their peers, and determine next steps towards implementation of their action plan.

How Can My State Participate? All States are invited to apply to participate in the Cohort. See the “How Can my State Apply?” section for details on how to apply. *Applications are due by December 7, 2018.*

Cohort Membership

- ◆ **Up to nine individual state teams will be selected to participate in this cohort.** Prior to applying, interested states must create a “State Team” that will include the following:
 - ✓ No more than six total representatives, with **one person** from each of the following programs:
 - WIOA titles I & III (Adult, Dislocated Worker, Youth, Wagner-Peyser Employment Service),
 - WIOA title II (Adult Education), and
 - WIOA title IV (Vocational Rehabilitation). *In States with a separate VR agency to serve individuals who are blind or visually impaired, a representative from that agency may also be included on the State Team.*
 - ✓ State teams may also include **up to two optional** representatives of the State’s choice (such as a board, WIOA partner program, agency staff member, or other appropriate state partner).
- ◆ **State Cohort Team Eligibility Criteria** – States that have made great strides in their utilization of performance data to demonstrate programmatic success, those that are still working to fulfill the statutory vision of WIOA performance, and states that would categorize themselves as falling somewhere in between the two categories are encouraged to apply.
 - **Mandatory Criterion** – State has submitted all PY 2017 Annual Performance Reports for Titles I, II, III, and IV in a timely manner
 - Selection criteria may also include geographic diversity, state size/population density, state organizational structure, and other criteria that may benefit the Cohort’s learning environment.
 - Additional consideration will be given for applicants who are current or previous recipients of a Workforce Data Quality Initiative (WDQI) or Statewide Longitudinal Data System (SLDS) grant.
 - State Teams may involve additional State and local colleagues to contribute to the relevant homework assignments, in-state working sessions and virtual discussions.

How Can my State Apply?

Applications for Cohort participation are due by **December 7, 2018**. See the attached cohort application document for details on how to apply and then submit the required information using our [Online Application](#).
