Construction curriculum are a key component of the construction training at a YouthBuild program. While all programs have certified instructors, not all are using the curriculum to its full potential.

The speakers talked about the variety of credentials offered through NCCER and HBI embedded in the standardized curriculum.

The HBI/PACT curriculum benefits were presented by Ted Roan from YouthBuild USA. The updates of new trade units and simulation videos were discussed as well as assessment opportunities through nationally recognized programs NOCTI and CAMT.

The NCCER representative Patty Bird led the discussion on the design of NCCER's Core curriculum and the advantages of stackable credentials within NCCER. John Havlik from NCCER led the group through the items in the NCCER, Instructor Resource Library and how the online tools can help instructors be more efficient and effective.
