

Executive Summary

H-1B TechHire Performance Data Review

April 16, 2020

Moderator: [Ayreen Cadwallader](#)

Speaker: [Timmy Dudley](#)

This session takes an in-depth look at performance protocols and promising practices to ensure that each TechHire grantee reports their most accurate and comprehensive data, and to support those H-1B TechHire grantees who are preparing to finalize their data for the final reporting quarter ending 6.30.20. The strategies provided during this webinar can also support those grantees that receive a Period of Performance Extension and have a FINAL Report due at a later time.

This webinar focuses on capturing performance outcomes, particularly for completion and employment. It is essential that grantees track and report accurate participant level data and specifically the data that populates the “real-time” employment and training outcome measures for their final reporting quarter ending June 30, 2020. Grantees are also provided with the opportunity to see how the TechHire grants are performing as a whole, and to compare their progress with their peers.

DOL has issued [Frequently Asked Questions \(FAQs\)](#) related to performance in light of the Coronavirus (COVID-19) public health crisis, and will continue to update the FAQs as needed. These FAQs are linked in this Webinar for reference.
