

## Executive Summary

### Overview: Data Integrity Technical Assistance Tool: Quarterly Report Analysis for Titles I and III

08/18/2020

Moderator(s): Christina Eckenroth

Speaker(s): Cesar Acevedo, Robert Hoekstra

- The Workforce Innovation and Opportunity Act (WIOA) requires the Departments of Labor and Education to establish data validation guidelines to ensure that information contained in program reports are valid and reliable. WIOA section 116(d)(5) requires the Departments of Labor (DOL) and Education (ED) to establish data validation guidelines to ensure the information contained in program reports are valid and reliable. DOL and ED collaborated to develop joint guidance (Training and Employment Guidance (TEGL) 7-18) and DOL published TEGL 23-19, with specific guidance for DOL grant recipients.
- To support Title I and III grantees' data validation efforts ETA developed the Quarterly Report Analysis technical assistance tool to identify anomalies and outliers, and other potential data quality issues, which may indicate reporting inaccuracies. Title I and III programs can use this tool to identify issues that may require additional attention or correction.

*This webinar:*

- Provides an overview of the Quarterly Report Analysis format for titles I and III grantees;
- Reviews the data inputs used to develop the Quarterly Report Analysis;
- Highlights the applications of the Quarterly Report Analysis; and
- Discusses implementation strategies to support state data validation approaches.
